

Supply Chain Management Forum

September 24 - 27, 2006 • Denver, CO

The **mySAP Supply Chain Management** solution helps you transform unsystematic, localized processes to a global, synchronized forecasting and demand planning tool that can respond to current and diversified business environments, allowing your company to maximize its return on assets and increase profitability.

Today's business environment requires the highest levels of demand and order fulfillment accuracy; your supply chain must provide robust planning and forecasting to meet your customer's expectations.

Our clients have seen benefits of mySAP SCM. As examples, APO allows our clients to create a consensus plan that is accepted and justified before the information is sent to the manufacturing plants. Also, demand aggregation allows planners to analyze global capacity (supply) and demand in a very effective way. The overall results are constantly used to monitor the forecasted values.

*"You & I," Unified, Working Together
to Accomplish Your SAP Goals*

Make sure to catch UniSAP's Presentation with AMO

***"How AMO Enabled Global S&OP Process with
APO Demand Planning"***

Tuesday 09/26 @ 11:00 a.m. Room 407

Ashwini K. Sinha, Supply Chain Management Practice

Ashwini Sinha has 25 years of advanced academic and industry experience which includes: Strategic Program/Project Management, Advanced Planning Systems, Business Process Engineering, Solution Architecture, Best Practices Implementations and Customer Training. He actively participated in the development of the SAP Aerospace and Defense Industry Solution (IS-A&D) during his tenure at SAP Labs in Palo Alto.

For over 12 years, Ashwini has been a Consultant and Trusted Advisor in the areas of SAP ERP and SCM implementation for a wide variety of clients including: ITT, Motorola, Galvantech, Tyco, Dow Corning, Palm, Nestle, Hasbro, Nike, SMART Modular, Fonterra and Advanced Medical Optics. He also has several years of major program development and management experience working with McDonnell Douglas, Boeing and other key defense companies in US.

At the present time, he is the Program Management Trusted Advisor for the Advanced Medical Optics ERP, Supply Chain and Manufacturing Solution global roll-outs to their Asian business units.

Ashwini has been associated with SAP SCM products since its inception in the mid to late 90's where he was involved in the very first APO implementation for a major defense contractor in the East Coast. Furthermore, he played an integral role with SAP-AG as well as key clients in order to develop several complex areas of APO such as SNP and PP/DS Optimization process, techniques, and performance enhancements.

Ashwini was also personally involved in the development and implementation of the CTM SNP Planning engine for APO and has utilized his diverse industry background and experience to work effectively with key clients in the Manufacturing, Semiconductor, Consumer Goods, Life Science, and Pharmaceutical industries.

During the last several years, Ashwini has implemented APO forecasting, supply network planning, and production scheduling systems. As UniSAP's Director of SCM practices, Ashwini is deeply involved with clients in several areas such as: Supply Chain Assessment and Outlining Strategy, Supply Chain Program Management, Solution Architecture, Client Training, and Full Cycle Implementation. Ashwini utilizes his experience and expert knowledge of SCM in order to provide companies with a customized solution that allows them to grow and reach their ultimate potential.

Thank you for your interest in our SCM Practice!
